The automatic folding machine **FX23** folds clothes quickly, quietly and precisely. It functions independently and requires 1 operator.

It is designed to fold t-shirts, sweatshirts, sweaters, undershirts, etc.

It can be very easily adjusted for the various sizes and types of clothes so that the best desired folding is achieved.

**FX23**, apart from the automatic folding, offers another two important options after the cloth has been folded.

**The first option** is a program for stacking and easy gathering of the folded clothes.

**The second option** is a program for easy packaging of the cloth in a bag.
