

**Industrial Steam Iron HI-350PS**

This iron has been developed with easy of use in mind.  
The temperature can be easily controlled using the thermistor and electric thermostat.  
An aluminium soleplate is used with a heater die casted in .thus the heater is very durable.  
The iron is made from light materials so the user does not become tired .  
Strong steam output is another of this machine's special features.  
As the steam chamber is completely sealed, and the main switch and thermostat are not on the actual iron, durability is insured.
